Saransh Gupta

Harness Engineer & Full Stack Developer

India | +91 7017025630 | saranshg180@gmail.com | github.com/SaranshG2501 | linkedin.com/in/saransh-gupta

Summary

Computer Science undergraduate and **Harness Engineer & Full Stack Developer** with hands-on experience building and debugging **LLM, RAG, machine learning, and real-time applications**. Skilled in Python, React.js, Next.js, REST APIs, MCP, vector databases, testing, and end-to-end application development.

Technical Skills

Languages	Python, JavaScript, SQL, HTML/CSS
AI / ML	Generative AI, LLMs, RAG, Vector Databases, Embeddings, Prompt Engineering, MCP Servers, Machine Learning
Frameworks	React.js, Next.js, Flask, FastAPI, LangChain, Firebase
Backend	REST APIs, MySQL, Database Migration, API Integration
Extras	API Testing, Git, GitHub, Vercel, Claude AI, Groq, AI-Assisted Development

Experience

Software Intern — Inovaantage Systems Private Limited **May 2026 – Aug 2026**

Hyderabad, India

- Contributed to the development and debugging of a full-stack GIS application using **React.js, Next.js, Python, and REST APIs**.
- Worked on **AI-assisted provider matching, RAG, semantic retrieval, PDF extraction, database migration, and API integration** across application workflows.

Projects

GISMarketplace — AI-Powered GIS Services Marketplace **2026 – Present**

Next.js, RAG, LLMs, REST APIs, Vercel

- **Situation** — GIS service buyers and providers needed a common ground to find each other.
- **Task** — Build an end-to-end marketplace capable of matching RFP requirements with suitable GIS service providers.
- **Action** — Built RFP, provider, and admin workflows; developed AI matching using **RAG, semantic retrieval, PDF extraction, and provider skill taxonomies**.
- **Result** — Delivered an AI-assisted GIS marketplace with database integration and API-based provider matching.

NCERT AI Learning Assistant — MCP & RAG **Mar 2026 – May 2026**

Python, MCP, Claude AI, RAG, Vector Databases, Embeddings

- **Problem** — Creating customizable question papers directly from NCERT textbooks required reliable retrieval of relevant textbook content.
- **Action** — Built a **RAG pipeline** using embeddings, semantic search, and vector databases to retrieve relevant textbook context, and integrated **MCP servers with Claude AI** for structured tool interactions.
- **Result** — Created a context-aware learning assistant designed to generate question papers grounded in retrieved NCERT content.

ChickenPox Detector AI **Feb 2024 – Apr 2024**

TensorFlow, Python, Flask, React.js, Machine Learning

- **Challenge** — Preliminary chickenpox detection from symptoms information in one accessible application.
- **Action** — Developed the **TensorFlow** image-classification workflow, exposed model inference through a **Flask REST API**, and built a React interface for image and symptom inputs.
- **Result** — Integrated the complete **React–Flask–TensorFlow** pipeline into a functional preliminary detection application.

LifePath — Interactive Decision Simulator **Dec 2024 – Present**

React.js, Firebase, JavaScript, Real-time Systems

- **Situation** — Gen Z learners need practical ways to explore real-life decisions and understand how different choices can affect future outcomes.
- **Task** — Build a multiplayer simulator supporting branching scenarios, synchronized decisions, and collaborative classroom sessions.
- **Action** — Built branching story flows and implemented **Firebase real-time synchronization, shared session state, multiplayer interactions, and classroom workflows**; debugged multi-user synchronization issues.
- **Result** — Developed a working multiplayer simulator with synchronized story progression across connected users.

Leadership

President — The Fusion Club, VIT Bhopal University *Jun 2025 – Present*

- Lead club teams and coordinate **event planning, operations, approvals, stakeholder communication, and member engagement** while driving collaborative campus initiatives.

Education

VIT Bhopal University — B.Tech, Computer Science Engineering *Sept 2023 – May 2027 (Expected)*

CGPA: 8.54 / 10

Certifications

Generative AI (Google) | Python (Kaggle) | Problem Solving (HackerRank) | MATLAB | Claude / Anthropic Courses
